

Kennedy made a cake for her mom's birthday and cut it into 24 equal pieces. Kennedy's mom ate two pieces of cake. Her sister ate three pieces of cake and her brother ate four pieces of cake.

1. This rectangle represents Kennedy's cake. Show one way Kennedy might have cut the cake to get 24 equal pieces.

2. Describe how much cake each person ate using **at least two** different fractions.

What fraction of the cake did Kennedy's mom eat?

What fraction of the cake did Kennedy's sister eat?

What fraction of the cake did Kennedy's brother eat?

3. How many pieces of cake did Kennedy eat if she ate one fourth of the cake?

4. Kennedy's grandma ate just one piece of cake. What fraction of the cake is left after everyone is finished?
