

1. Line A is divided into fourths. Label each mark with a fraction in simplest terms.
Line B is divided into sixths. Label each mark with a fraction in simplest terms.
Line C is divided into tenths. Label each mark using a decimal.

2. What mark on line A is closest to each of the following decimals? Explain your reasoning.

0.9 _____

0.3 _____

3. What mark on line B is closest to each of the following decimals? Explain your reasoning.

0.4 _____

0.1 _____

4. What mark on line C is closest to each of the following fractions? Explain your reasoning.

$\frac{3}{4}$ _____

$\frac{2}{3}$ _____

$\frac{1}{6}$ _____

5. In which lettered-section is each of the following decimals located? Explain your reasoning.

0.76 _____

0.48 _____

0.23 _____

0.11 _____

0.9 _____

0.2 _____

6. Decide which letter best represents each fraction or decimal. Explain your reasoning.

$\frac{1}{2}$ _____

0.07 _____

0.7 _____

0.33 _____

$\frac{11}{12}$ _____
