

Problem 1: Emma just returned from a shopping trip. She bought 17 new outfits but discovered she doesn't have room for any of them in her closet! Emma's closet can hold 45 outfits. If you combine this with the number of outfits she just bought today, what is the total amount of outfits Emma has?

Problem 2: Emma decided to get rid of 26 of the 45 original outfits that were in her closet. How many of the original outfits is Emma keeping?
