**Problem 1:** Skylar's rain gauge measures $\frac{3}{4}$ inch of rain, while the weatherman says we received 0.75 inch of rain. Shade $\frac{3}{4}$ of the following 10-by-10 grid. Use the grid to explain why $\frac{3}{4}$ and 0.75 are equal.

Problem 2: Shade 0.8 of the following grid. Write 0.8 as a fraction. Use the grid to explain why your answer is correct.
