**Problem 1:** Two fifths of Rocco's morning class will perform at a recital. If 20 students are in the morning class, how many will perform at the recital?

**Problem 2:** Twelve students from Rocco's evening class signed up to be at the recital. That is two thirds of the class. How many students are in the evening class?

**Problem 3:** There are 24 students in Rocco's drum class, but only six students can attend the recital. What fraction of the students in the drum class can attend the recital?
