

Video Title	Grade Level	Domain (Topic)	Cluster	Standard
Division Procedure	4th	Number and Operations in Base Ten	Use place value understanding and properties of operations to perform multi-digit arithmetic.	<b>CCSS.MATH.CONTENT.4.NBT.B.6 Find whole-number quotients and remainders with up to four-digit dividends and one-digit divisors, using strategies based on place value, the properties of operations, and/or the relationship between multiplication and division. Illustrate and explain the calculation by using equations, rectangular arrays, and/or area models.</b>
	4th	Measurement and Data	Solve problems involving measurement and conversion of measurements from a larger unit to a smaller unit	<b>CCSS.MATH.CONTENT.4.MD.A.2 Use the four operations to solve word problems involving distances, intervals of time, liquid volumes, masses of objects, and money, including problems involving simple fractions or decimals, and problems that require expressing measurements given in a larger unit in terms of a smaller unit. Represent measurement quantities using diagrams such as number line diagrams that feature a measurement scale.</b>
	6th	The Number System	Compute fluently with multi-digit numbers and find common factors and multiples.	<b>CCSS.MATH.CONTENT.6.NS.B.2 Fluently divide multi-digit numbers using the standard algorithm.</b>
